SKILLS

CORE

TypeScript
React
Node.js

PLATFORM

Nx
pnpm workspaces
Design Systems
Component Libraries
CI/CD
GitHub Actions

AI

Custom Agents
Skill Authoring
Subagent Authoring
Cross-tool Rule Sync
Claude/Cursor/Codex

UI

TanStack Query
TanStack Router
TanStack Start
Jotai
Tailwind
shadcn/ui
Radix
AG Grid
AG Charts
React Native

TESTING

Vitest
Playwright
React Testing Library

EDUCATION

Associates Degree
Liberal Arts
Trident Technical
Charleston SC
2012

EXPERIENCE

Chatham Financial // Oct 2023 - Present // Staff Engineer / Tech Lead

- Lead a UI platform team of four engineers building the design system, component library, and build tooling used by ~10 product teams
- Architected and launched a greenfield monorepo replacing a legacy polyrepo of disjointed UIs with no shared standards, shipping Onyx as its first product
- Built in-house AI tooling for PR review, architecture design, and contributor workflows, with custom agents and shared rulesets kept in sync across Claude, Cursor, and Codex
- Scaled that tooling to 30 engineers and 10 designers, enabling high-quality contributions from outside frontend and reducing the human review required on each change
- Own the platform layer enabling continuous deployment, automated code owner and reviewer assignment, and consistently low build times
- Coordinate breaking platform changes across consuming teams by owning the migration work rather than pushing it downstream, backed by a formal RFC, ADR, and tech spec intake process
- Founded the UI Champion program: 10 engineers embedded in product teams as spokes to the platform hub, giving every team a named frontend owner and a direct path for standards to land

Grindr // Jan 2023 - Aug 2023 // Staff SWE

- Led the launch of web.grindr.com, the company's first web client for a previously mobile-only product
- Mentored and paired with engineers, and interviewed and hired for the team

Twitter // Aug 2021 - Nov 2022 // Senior SWE

- Built and maintained twitter.com and tweetdeck.com
- Maintained and refactored the shared component library and central UI surfaces including navigation and preferences
- Delegated projects and grew engineers on the team

Hotel Engine // Oct 2020 - Aug 2021 // Senior SWE -> Tech Lead

- Led a pod of four engineers, promoted from Senior into the tech lead role
- Built and enforced the internal component library adopted across product teams
- Founded a cross-discipline React guild to align frontend practice between pods
- Shipped and maintained the React web app and React Native mobile app

Skookum // Nov 2018 - Oct 2020 // SWE I -> SWE III

- Built centralized design systems for client teams across a range of technologies
- Rewrote legacy code in modern frameworks and mentored junior developers

UNION // Oct 2017 - Nov 2018 // Web Developer

- Built reusable React component libraries for nationally recognized brands
